## DETAILED ACTION

### *Receipt Acknowledgement*

1. Receipt is acknowledged of the Preliminary Amendment filed on 25<sup>th</sup> of September 2001. Claims 1-8 have been amended; no claim has been canceled; and no claim has been newly added. Currently, claims 1-8 are pending in this application.

### *Claim Rejections - 35 USC § 112*

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 1-8 are rejected as failing to define the invention in the manner required by 35 U.S.C. 112, second paragraph.

The claim(s) are narrative in form and replete with indefinite and functional or operational language. The method steps which go to make up the invention must be clearly and positively specified. The method steps must be organized and correlated in such a manner as to present a complete operative method.

In this case, the Applicants recite an invention in a narrative form in the claim(s). However, the method steps of the claimed invention which goes to make up the method, is not clearly and positively specified in the claim(s). For example, there is not any "transitional phrase" and "method steps" in the claim 1. Furthermore, the claim 6 (i.e., apparatus for carrying out the method according to Claim 1) is also having the above problem since the independent claim 6 is carrying out the method according to the claim 1, which has been rejected as failing to define the claimed invention in the manner required by 35 U.S.C. 112, second paragraph.

The claims 2-5 are dependent claim of the claim 1, and the claims 7 and 8 are dependent claims of the claim 6.

Therefore, the Examiner couldn't perform a proper search of prior art because the claim(s) are replete with indefinite and functional or operational language.
